United States Women of Today and friends!!

OK...I have spent one trimester already, soaring across the U.S. It has been an amazing journey so far! Thank you so much to our member states and chapters for making it a fantastic ride! We have had seven new intents to extend! That added to our extensions in progress makes 10 new chapters being worked on currently. We are soaring! There is interest in California and in Maine by community members who have seen our organization and the good things that our chapters do in and around our communities. They want to be a part of it! Please think about extending a new chapter. There are benefits to our organization as well as benefits to you and your chapter. There is no better feeling of accomplishment to me, than beginning a new chapter and watching it and it's members grow. It is an amazing process to be a part of! I encourage you to try it.

US Women of Today members, see below for some incentives and challenges in the Extensions area.

If you are someone who is not a member of our organization, but you are reading this page, please do contact me. I can help you to be a part of this great organization by helping you to begin a chapter in your area.

This is it US Women of Today. This is the time to be a part of something fun! An extension! Contact me for more details.

Judy
